**Every month on average,
we protect users by blocking**

Over 1.5 billion malware attacks

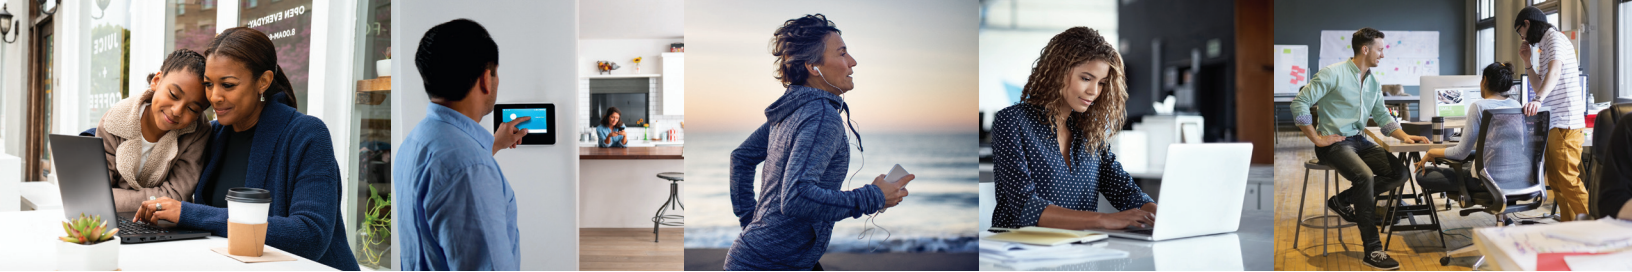

Over 33 million phishing attacks and 3 million unique phishing URLs

Over 4 million ransomware attacks

Global
leader in
cybersecurity

Avast combines artificial intelligence with human ingenuity to create the world's largest cybersecurity network protecting people and businesses from attacks online. We safeguard their data, identity, privacy, and digital relationships with sophisticated solutions that are engaging and easy to use.

Protecting Digital Lives

Our mission is to make the online world a safer place so that digital citizens are free to enjoy safe and private connected lives.

We believe in an open and connected world where everyone has the right to access the same information and experiences online.

Online and IoT Security

Everyone has the right to be safe online. Our award-winning free and premium cross-platform digital security products protect people from viruses, spyware, ransomware, stalkerware, Wi-Fi-based threats and browser-based risks. Avast Omni keeps connected devices in smart homes safe and secure.

Privacy and Identity

You share personal information every time you go online. Control your privacy and identity with our products which prevent tracking, monitor for data breaches and provide privacy settings guidance. Surf safely and privately with Avast Secure Browser or connect privately with Avast SecureLine VPN.

Performance Optimization

Our products help people boost their productivity with cleanup and performance products that optimize their personal computers and Android devices by removing junk and unwanted files.

Business Security

We safeguard small and medium businesses from the growing threat of cyberattacks which cause downtime, lost revenue, and reputational damage.

Offering includes integrated, layered endpoint, patch management, and cloud-based security solutions.
